

OPPOSE Copywrite flag that would prevent home taping. Two main reasons:  
I don't watch anything in real time anymore. I record and playback later to change the time slot and avoid the EXCESSIVE number of commercials in some of todays broadcast schedule (station dependent).  
The technology that they use would inconvenience the average consumer & be easily defeatable by a few years technology advance.  
It is a lost cause to annoy the average consumer & foster a new industry to circumvent the headache.
